Key features of SynapseAnywhere

Benefits for Clients

Taylor offers a free Warehouse Management System (WMS) Customer Portal, powered by Synapse, a Made4Net product. Designed to optimize inventory management and reporting, this advanced portal provides clients with robust visibility, efficiency, and control over their supply chain operations.

Enhanced Operational Efficiency

Synapse's advanced technology improves control over logistics processes, reducing errors, minimizing delays, and boosting overall workflow efficiency.

Data-Driven Insights

Detailed data analytics help clients identify patterns, improve forecasting, and increase agility.
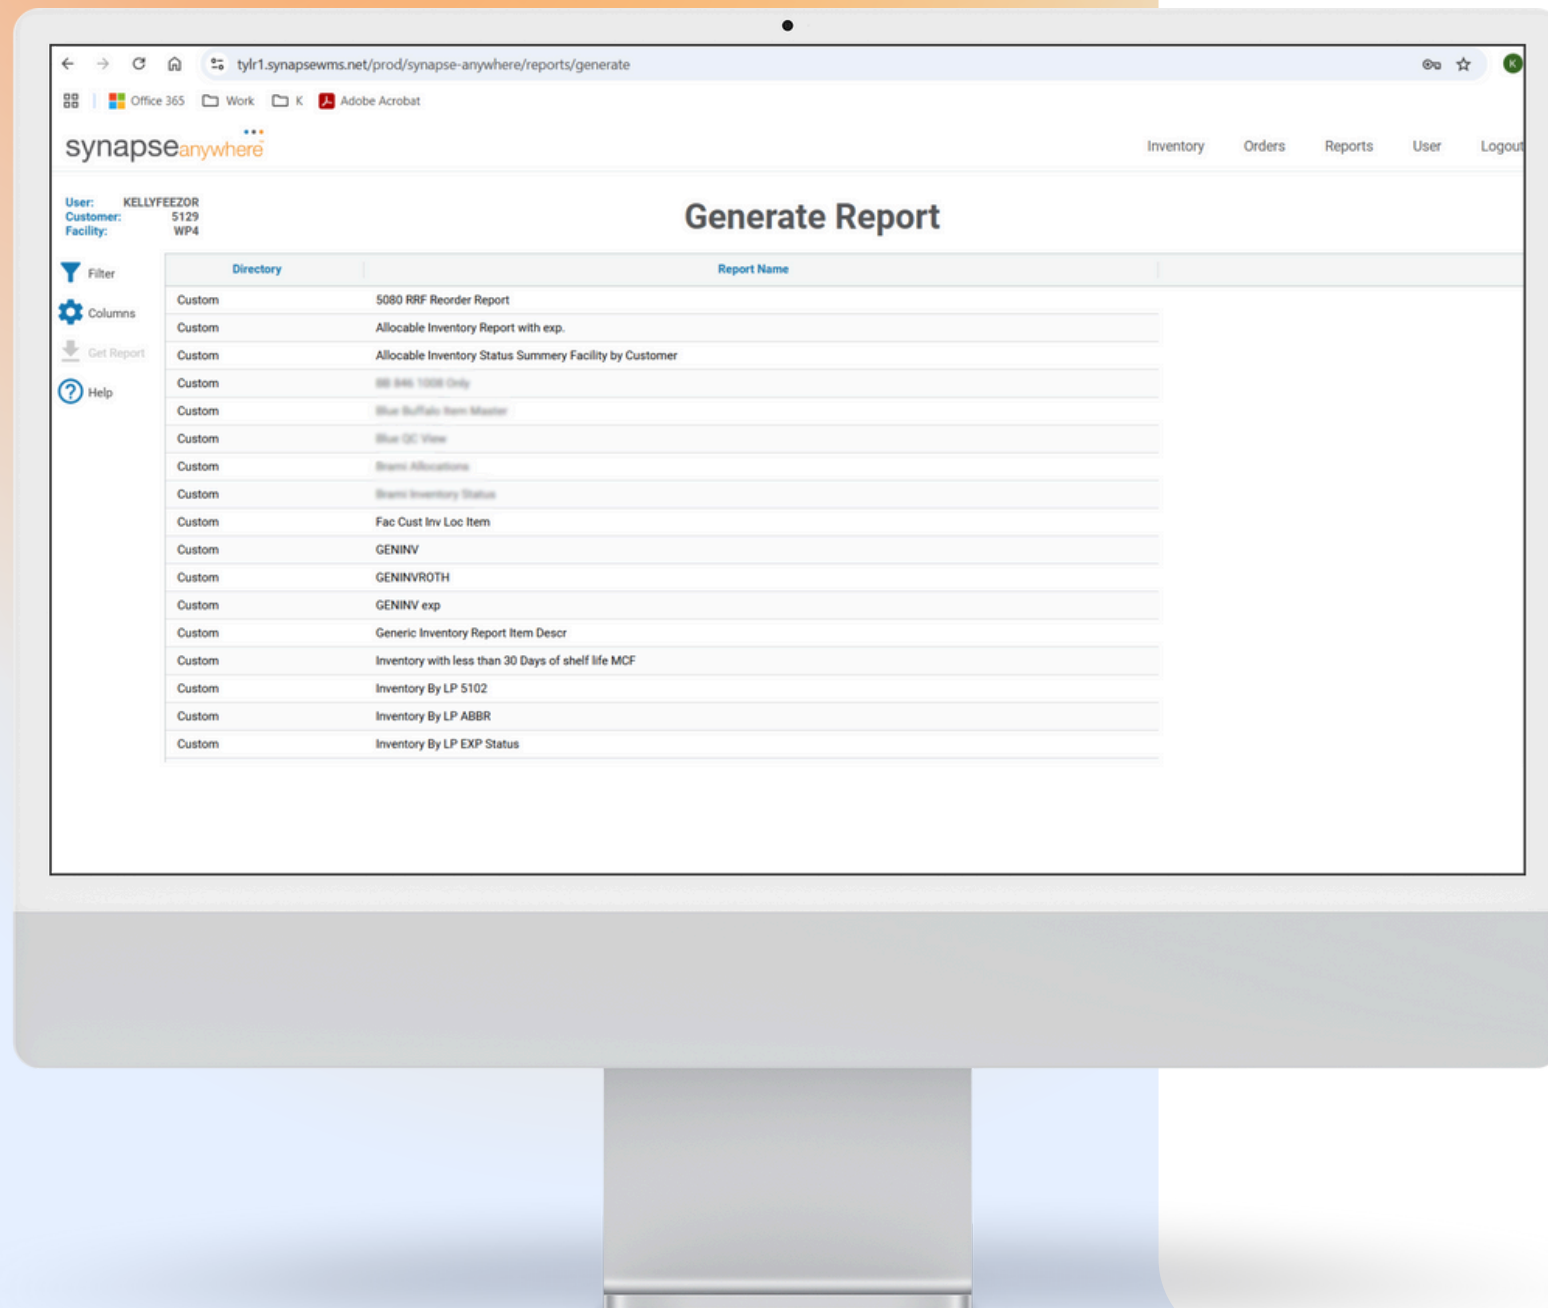

Scalable Solutions

Built to support operations of any size, Synapse's customizable approach ensures it grows seamlessly alongside your business.
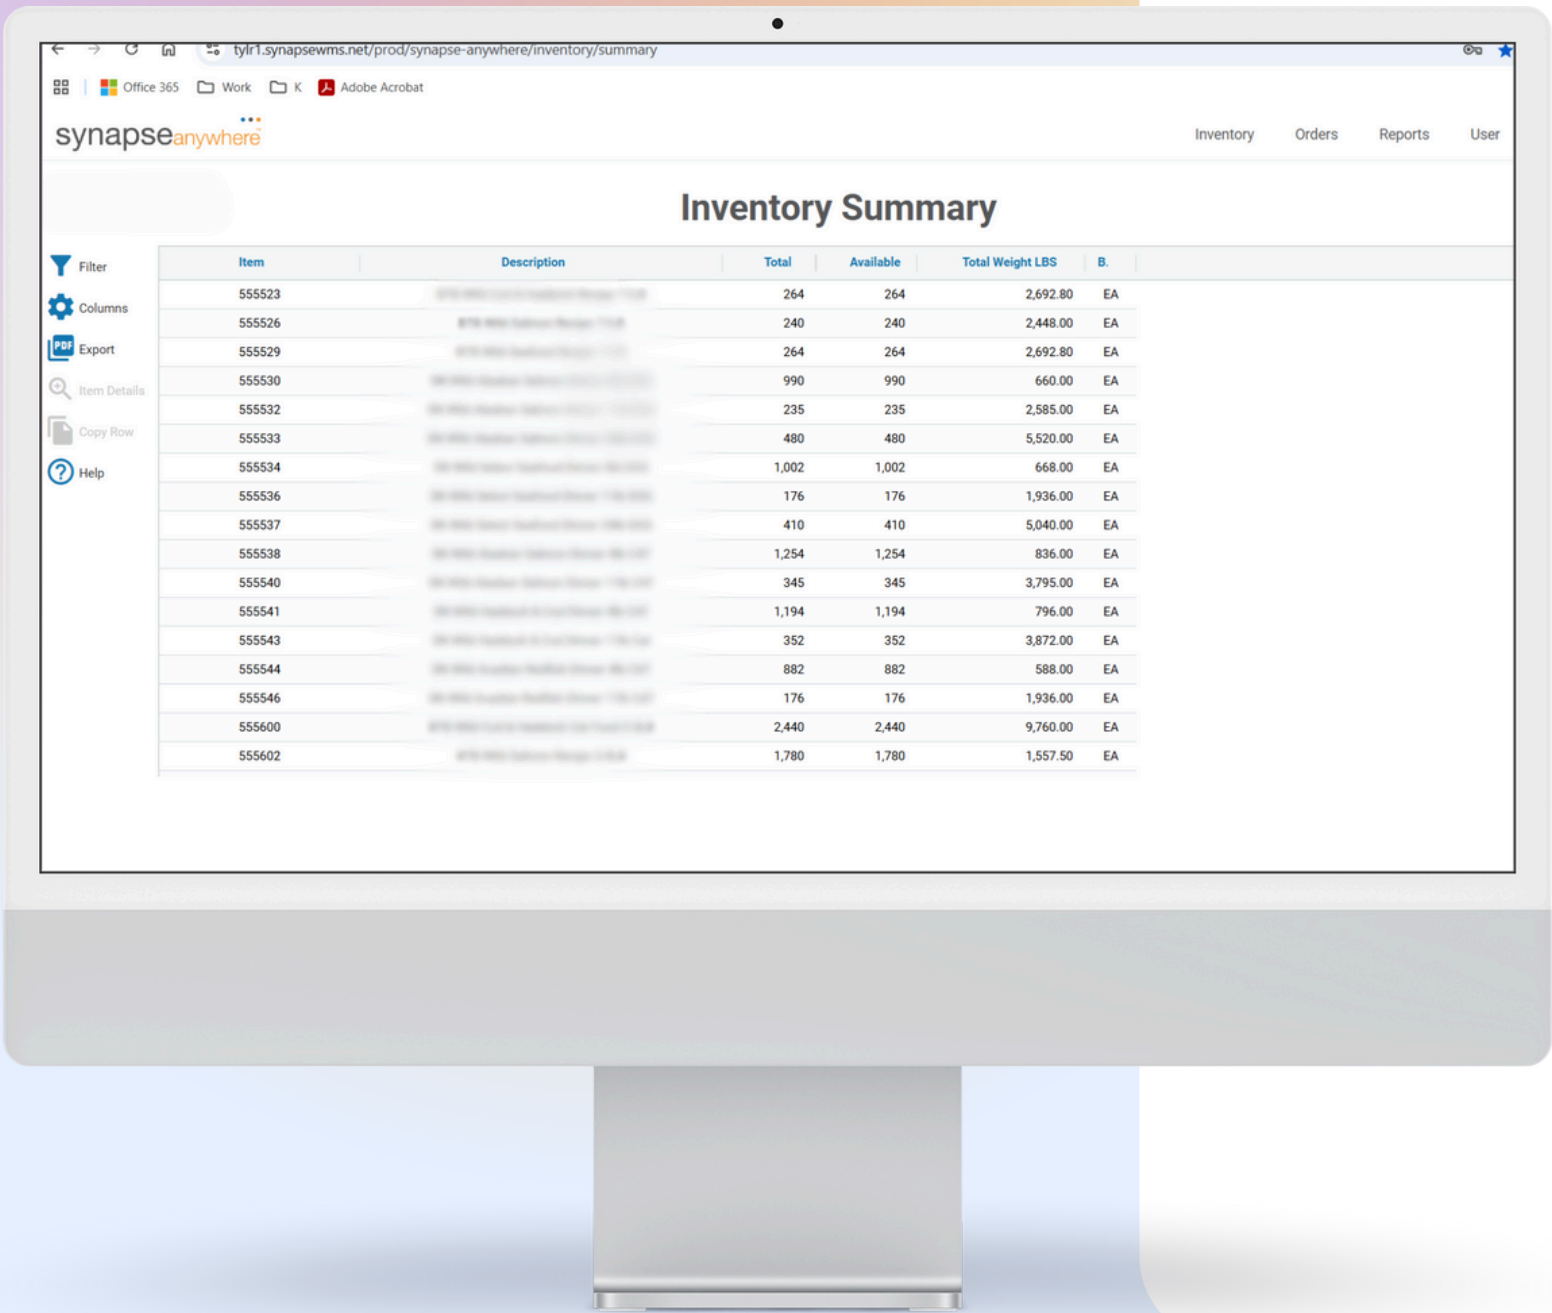

Product feature

Generate Reports

Users can generate customized reports in Excel, PDF, and other formats, with options for automatic delivery to their inbox at preferred intervals. This feature enables clients to track inventory trends, monitor order fulfillment, and evaluate efficiency, facilitating data-driven decision-making and enhancing overall supply chain management.

Product feature

Live Inventory

SynapseAnywhere provides a powerful live view into inventory, giving clients real-time visibility that enhances operational efficiency and decision-making. Users can monitor inventory levels by their preferred unit of measure (UOM), track movements, and assess stock availability instantly. This immediate access allows businesses to respond quickly to changing demands, optimize stock management, and minimize the risk of stockouts or overstock situations. With this live view, users can make informed decisions based on the latest data, ensuring they maintain control of their inventory and meet customer expectations effectively.

Reviews from Our Customers

"I get the impression that the WMS platform as a whole is designed with users in mind. When I first saw the capability to view my information, I thought, 'Wow, this is exactly what we need"

— **Katy K.**

"Before learning to use Synapse Anywhere, I felt like I was flying blind. Now, I have real-time visibility into our operations, which has transformed how we make decisions"

— **Nicole K.**

"It's fundamental enough not to be overwhelming but robust enough to be genuinely useful. Plus, any time we need a report tweaked, the team is super responsive, making adjustments to meet our needs"

— **Trevor B.**
